Overview & Experience Summary

Dave is a consultant architect with over 30 years' experience in financial services, primarily in retail banking. With extensive experience in all aspects of the application landscape within a banking eco system, Dave has worked for many banks in many countries at a senior architectural level

- Temenos (core banking software provider) - bringing Enterprise Architecture knowledge to the Tier 1 sales process in the US. Provided architectural "trusted advisor" approach to working with the client banks, in this case Regions Bank in the Southern US. This culminated in Regions signing one of the largest software deals in Temenos history
- Bank of Ireland – engaged to bring to bear extensive knowledge in the field of core banking systems and core banking replacements, more specifically to review existing approach with Temenos, bring essential knowledge into the BOI team, provide thought leadership and architectural best practice across the BOI eco system.
- AMP bank - create an architectural practice in support of a large, multi-year transformation program. Hired 7 new architects of different specialisation, data, security, integration and application, and implemented the process and forums required to provide architectural governance, reporting directly to the group CIO.
- Macquarie Bank - principal architect within their architectural practice, helped to pivot the division to Agile with specific reference to the role of architecture as a day to day function within and across agile delivery teams.
- Spent over 10 years across multiple contract engagements at Lloyds Banking Group across a range of topics from BPM and CRM platforms, to payments and core banking replacements.
