Overview & Experience Summary

Ezekiel is a Principal Architect with over 15 years of expertise across industries such as technology service providers, higher education, and utilities.

In my role as a Principal Architect, I have consistently delivered high-impact strategies in both permanent and consulting capacities, leveraging a deep understanding of business and technologies convergence across multiple disciplines. I have held senior technical positions where I've driven transformative projects and contributed to the success of major organizations. A highlight of my career has been spending several years working with a leading electrical utility renowned for its award-winning digital advancements. This experience has solidified my reputation as a visionary in enterprise architecture and digital innovation.

(Seattle USA /Adelaide Based) - Principal Enterprise Architect

As the leader responsible for establishing the enterprise and solution architecture practice within a top 5 Fortune 500 company, I serve as the highest technical design authority, overseeing the architecture practice at a global scale. My role encompasses a range of strategic responsibilities, including:

- Developing key architecture artifacts such as capability models, current-state and target-state conceptual architectures, and comprehensive technology roadmaps.
- Providing insights and strategic guidance to directors to inform digital transformation initiatives.
- Managing a geographically distributed team across the U.S., Australia, and India, ensuring seamless collaboration and execution.

Beyond my core architecture duties, I have significantly contributed to organizational advancements by supporting initiatives such as the establishment of an innovation center, implementing advanced building analytics, designing commute programs, and shaping the overall corporate strategy. This multifaceted role underscores my ability to deliver impactful and executable strategies one of the worlds largest companies.

Aboitiz Power (Remote, with travel to the Philippines) – Lead Enterprise Architect

Served as the lead consultant for Aboitiz Power's multi-year Enterprise Architecture (EA) and transformation initiative. This engagement encompassed the full spectrum of activities, from defining strategic intent to assessing current-state architecture and designing a comprehensive target-state framework.

Key contributions included:

- Defining and estimating 52 projects spanning all business units to align with the organization's transformation goals.
- Developing a strategic roadmap to unify over 40 companies into a single, cohesive organization, providing guidance to ensure seamless integration and alignment across all entities.

This role required a blend of strategic vision, architectural expertise, and project execution capabilities to drive enterprise-wide transformation
