Overview & Experience Summary

Kate is an enterprise architect specialising in Business Capability Modelling (BCM). She has previously worked on engagements within the private, Local and State Government sectors and in a variety of roles within Law Enforcement, Health, Local Council, Finance and IT.

Kate has a broad range of experience in business capability modelling, business intent elucidated, current state assessment and technology roadmap production. This builds upon her previous work in business analysis, compliance and governance, and, customer service. Kate has a developed appreciation for the different perspectives business areas face when undertaking technology projects. Understanding these perspectives allows Kate to work closely and collaboratively with stakeholders across organisations to develop and support business requirements and deliver their desired outcomes.

Kate has a proven ability of producing high quality written artefacts of a technical or business-oriented nature for consumption at all levels of an organisation. She is adaptable, motivated, genuinely interested in her work and is passionate about helping others achieve success.

- Facilitated Business Capability Workshops for the Australian arm of Global Payments (an e-commerce solution provider) and delivered a Business Capability Model and insight overlays to drive strategic planning.

- Conducted Business Intent Workshops, mapped current and target state ERP solution onto the BCM for Adelaide Hills Council, and provided a high-level roadmap and budget estimations.

- Developed Business Capability Model, current state assessment, heat maps and documentation to identify a target state architecture and an executable technology roadmap to support multi-year transformation for Aboitiz Construction.

- Responsible for the Stage 1 and Stage 1B work for the Aged Care Quality and Safety Commission (ACQSC), including facilitating workshops, creating a planning level Business Capability Model (BCM), accompanying BCM descriptions and a current state overlay.

- Assisted in the production of phase one of a target state for a Digital Information, Intelligence and Evidence Management System for the South Australia Police.

- Participated in review and refresh of the Teachers Health Group Business Capability Model, including the running of stakeholder workshops.

- As part of F2A's ongoing IP development, undertaking a project to produce a gold standard example of a Business Capability Model, including specific, detailed capabilities for a wide range of industries.

- Development of a Business Capability Model, current state assessment, target state architecture and an executable technology roadmap to support digital transformation for the Department of Child Protection.

- Provided Business Capability Modelling training to key stakeholders from the Dept of Child Protection.
