Overview & Experience Summary

Pam is an experienced architect and leader who has managed and supported multi-disciplinary teams of technical and business resources working for clients in South Australian Government, Local Government, Lendlease, Baulderstone, and HP. Clients include City of Port Adelaide Enfield and City of Charles Sturt, City of Central Coast, Laing O'Rourke Select, Telstra, Optus, Department of Defence, Department of Health, and National Australia Bank. Extensive experience in complex IT systems and business transformation projects with strong skills and experience.

- Development of business intent, current state assessment, and heat maps to support executable transformation roadmap at a local council. Solution delivery estimation, vendor engagement and production of Technology Roadmap.

- Combined business acumen and technical knowledge to design complex solutions that reply with the required delivery frameworks.

- Ability to deliver complex projects across technology boundaries.

- Setting up governance and processes for project reporting, financial management, and strategic planning for DTF.

- Managed the Practice of a global team of IT architects, including EA, Domain and Solution Architects. Provided guidance and process within the Practice for architecture at all levels.

- Established and matured the Solution Architecture Practice capability and built up the team to become a highly valuable resource pool for solution delivery across Lendlease IT.

- Conceptualised and established a Quality and Design Practice in Lendlease IT to ensure stability and reliability of solutions being developed in IT. This new practice (Solution Architecture) called on Pam's in-depth experience in all levels of developing solutions in Financial, Health, Government and Construction sectors.
