Erik Van Zanten

Lead Architect | Project Manager

Erik is an experienced Project Management and Solution Consultant with Fragile to Agile. He has over 25 years' experience in digital transformation programs in consulting and management roles with Shell, BHP, Ernst & Young, IBM, Origin Energy, Cobham Aviation Services, SA Power Networks, and DXC.

As a Lead Architect for Fragile to Agile, Erik delivered business capability models, technical architecture and roadmaps, architecture maturity assessments, and digital transformation projects, including

- Architect services for Santos' Digital Technology team target state architecture, solution design and delivery of Operational Excellence capabilities particularly Reliability & Integrity Management, Process Safety, and Risk Management;

- Payroll and Work Management solution and project assessment for Babcock;

- Current State Assessment for SAPOL applications including application assessment criteria refinement as per requirements;

- Business Capability Model and Capability Maturity Assessment Framework development for Teachers Health Fund;

- Finance and Maintenance Systems reviews for Flinders Port Holdings;

- Patient Administration System investigation for SA Health, delivering Requirements Definition, Business Capability Model, Gap analysis, and BCM overlays;

- Technical Roadmap for Beyond Bank;

- Solution study for Naval Group Australia, including Requirements Definition, Functional Specification, Market Assessment, Implementation Roadmap, and Cost estimates;

Prior to Fragile to Agile, as Project Manager with DXC, Erik was responsible for delivery of Microsoft ERP & POS solution for Peregrine Corporation, overseeing the 60+ project team, adopting Agile and Scrum methodologies.
